algorithms API

2.13 s

should return and object	passed	1 ms
should list all	passed	1.58 s
should get one	passed	81 ms
should add one	passed	132 ms
should update one	passed	170 ms
should delete one	passed	168 ms

datafiles API

140 ms

should return and object	passed	0 ms
should add one	passed	16 ms
should add duplicated	passed	19 ms
should get all	passed	27 ms
should get reference	passed	24 ms
should delete file	passed	21 ms
should not delete non exist file	passed	0 ms
should remove all	passed	33 ms

datasets API

790 ms

should return and object	passed	0 ms
should list all	passed	81 ms
should get one	passed	82 ms
should add one	passed	82 ms
should update one	passed	163 ms
should delete one	passed	255 ms
should get by query	passed	127 ms

jobs API

755 ms

should return and object	passed	0 ms
should add one	passed	164 ms
should list all	passed	167 ms
should get one	passed	85 ms
should update one	passed	166 ms
should delete one	passed	173 ms
